

GREENBERG MILLENNIAL SURVEY

A Unique and Powerful Generation Comes of Age

SURVEY RESULTS FROM THE MILLENNIAL GENERATION, BORN 1978-2000

A NEW GENERATION is about to seize the reins of history—the Millennial generation. Born between 1978 and 2000, the Millennials currently include 95 million young people up to 30 years of age—the biggest, most diverse, and best-educated age cohort in the history of the nation.

During 2007-8, Eric H. Greenberg sponsored a major research study into the values and attitudes of the Millennials whose results have never before been fully revealed. Conducted by Gerstein | Agne Strategic Communications, it included an in-depth national survey of 2,000 individuals aged 18 to 29 as well as a series of twelve focus groups. *This research revealed that the Millennials generation is:*

- **Self-aware and committed to generational solidarity.** Millennials do not see themselves at odds with older generations of Americans, but they do believe their generation has a unique set of experiences that set them apart.
- **Strongly progressive,** socially tolerant, environmentally-conscious, peace-loving, and poised to lead the biggest leftward shift in recent American history.
- **Sober but optimistic** in their assessment of the future. The Millennials worry about being the first generation in American history to be worse off than their parents—but they believe this fate can be avoided through shared effort.
- **Enthusiastic about the power of collective social action.** Millennials don't see government as a panacea, but they believe in its potential and want to take it back from the special interests and the power elites.
- **Unselfish and socially committed.** The Millennials are not a "Generation Me" but rather a "Generation We." They volunteer in record numbers and declare themselves ready to sacrifice their self-interest for the greater good.
- **Incredibly tuned in to technology,** having already played a major role in creating and shaping technologies (such as social networking) that are changing the world.
- **Innovation-minded,** seeing not a world of limits but one of possibilities in which anything can be accomplished with enough creativity and determination.
- **Post-ideological, post-partisan, and post-political.** Millennials disdain rigidly "conservative" or "liberal" approaches, and they are fed up with the interest-group conflicts and identity-based appeals they see as dominating politics.

"In my travels around the world, I have been very impressed by today's young people. They are smart, caring, creative, and generous. I share the hope expressed by Greenberg and Weber that this new generation will help re-orient our planet and conquer the problems of poverty, war, and pollution that currently plague it."

THE POLITICS OF THE MILLENNIALS

Perhaps the most important characteristic of the Millennials is their across-the-board rejection of the country's current leadership and dominant institutions. Whether it be Congress and the federal government, major corporations, or organized religion, these young Americans believe the large institutions that dominate modern society have comprehensively failed, placing narrow self-interests ahead of the welfare of the country as a whole. Frustrated and seeking an outlet for their innate idealism, they are eager for wholesale change.

The Millennials have already begun shifting the nation's politics. Having come of age with Washington dominated by Republicans, they leaning strongly the opposite way. Although they reject both "liberal" and "conservative" labels, they are especially scathing in their denunciation of conservatism, which they associate with hypocritical moralism, administrative incompetence, ideological rigidity, and corporate scandal.

...Americans aged 18-29 identify themselves as Democrats (or "lean" Democratic) over Republicans by a 58 to 33% margin. This is the largest progressive shift since the New Deal...

From Generation We™ in reference to an April 2008 survey by the Pew Research Center for the People and the Press

In 2002, Millennials voted Democratic by a 49-47 margin. Since then, their progressive tilt has steadily increased. Their votes made the 2004 presidential race close and decisively tipped the 2006 Congressional elections, with 18-29 year olds favoring Democrats 60-38.

Generation We has turned out in record numbers in the 2008 primaries, helping to create the amazing groundswell for Sen. Barack Obama. His bipartisan approach to problems, his use of social networking and other electronic campaign tools, and his personal appeal as a symbol of a youthful, educated, and diverse America make Obama the archetypal candidate for Millennials to rally around.

If Sen. John McCain is to compete for his share of the Generation We vote, he will need to eschew the politics of personal attacks, culture war, ideology, and intense partisanship, and instead burnish his image as a creative problem-solver, a social moderate, and a civil campaigner dedicated to compromise and service rather than party.

Restoring and protecting the environment, providing quality nutrition and health care for all, modernizing our educational system, balancing the national budget and eliminating the national debt, and Restoring civil rights, freedom of expression, and individual privacy.

THE MILLENNIAL AGENDA

Generation We is inheriting a damaged future and a series of problems that are of crisis proportions. They have no choice other than to innovate their way out of the mess they (and we) are in. Their change agenda begins with Project FREE, a concept that earned overwhelming support from the Millennials who participated in the Greenberg research. The concept: To create an Apollo or Manhattan-like project to invent new sources of non-fossil fuel energy free from carbon emissions, based on hydrogen, fusion, or other means. Project FREE's ultimate goal is to free Americans from dependence on centralized sources of energy and instead to generate most energy at the point of need.

Other items of importance on the Millennial agenda include restoring and protecting the environment, providing quality nutrition and health care for all, modernizing our educational system, balancing the national budget and eliminating the national debt, and Restoring civil rights, freedom of expression, and individual privacy.

The political leaders who act first to join Generation We in their quest for a new era of American freedom, security, and prosperity will become generational heroes and benefit spectacularly from the epochal political realignment that has already begun.

GEN WE: VOTING HEAVILY DEMOCRATIC

In the 2006 congressional election, 18-29 year olds favored democrats 60-38

In 2002 Millennials voted democratic by 49 to 47 percent.

In 2004 Millennials aged 18 to 24 favored democrat John Kerry for president by 56 to 43 percent.

Q We often look at history in terms of generations -- groups of people of similar age and experiences who often share specific attitudes and priorities regarding the world around them -- such as the Baby Boomers or Generation X. As you look at your own generation of young adults under the age of 30, do you agree or disagree that your generation shares specific beliefs, attitudes, and experiences that set you apart from generations that have come before you?

Q Please tell us how important each of the following has been in shaping the attitudes and beliefs of your generation of Americans under the age of 30, on a scale of 0-10, where 10 means it has been extremely important in shaping your generation's attitudes and beliefs and 0 means it has not been at all important. You can choose any number between 0 and 10 - the higher the number, the more important that factor has been in shaping the attitudes and beliefs of your generation.

Q Now let's look at some potential solutions for some of the major challenges facing our country today. For each, please tell us how effective you feel each of the following would be in addressing that issue, on a scale of 0-10, where 10 means it would be extremely effective in addressing that challenge and 0 means would not be at all effective. You can choose any number between 0 and 10 - the higher the number, the more effective you feel the solution would be in addressing that issue.

	MEAN	10	8-10	6-10	0-5	DK/REF
Launch a concerted national effort, similar to the Apollo Program that put a man on the moon, with the goal of moving America beyond fossil fuels and inventing the next generation of energy, based on new technologies such as hydrogen or fusion. This aggressive plan would require a huge national investment but would produce millions of new jobs, could dramatically reduce environmental damage, and free us from our dependence on fossil fuels and foreign oil.	.70	21	49	71	29	0
Commit ourselves to a comprehensive effort to not only reduce the pollution we are putting into the environment but reverse the damage we have done. That damage is not only polluting the earth, it is causing unprecedented disease and suffering in communities throughout our country and across the globe.	.6.9	20	46	69	30	0
Provide quality health care and nutrition for all children in our country, regardless of their financial condition. Poor nutrition is creating an epidemic of preventable chronic diseases, including diabetes and obesity, that will cost our country billions of dollars and ruin the lives of millions of children.	.7.3	29	53	75	25	.
Provide equal funding for public education and learning resources for all children and all communities, regardless of economic class. This is a critical investment in the human potential of our country and its ability to compete in a global economy.	.7.2	27	53	73	27	0
Balance the federal budget, but also eliminate the 8 trillion dollars of national debt that have been built up over decades of irresponsible spending. This debt makes it impossible for our country to keep pace and leaves us indebted to other countries who are potential competitors.	.6.8	16	43	69	31	0

Fully fund Social Security, Medicare, and other social insurance commitments being passed on to future generations, which have doubled to over 40 trillion dollars just since 2000 and are increasing by several trillion every year. .....6.7 17 43 66 33 0

End trade imbalances that see us importing nearly 1 trillion dollars per year more than we export to other countries by restoring our industrial base. Restoring our industrial base and eliminating our trade deficit will provide secure jobs with good wages and benefits and rebuild our shrinking middle class.

.....6.6 16 39 66 33 0

Begin to rebuild America's economic self-sufficiency by restoring our industrial base to provide the essential components needed to provide for our defense and basic economic needs. As we have seen with oil, we can no longer afford to rely on other countries for our most vital economic and security needs.

.....6.8 16 41 70 30 0

Protect our civil rights by reversing recent actions to restrict our right to privacy and to limit access to government information, ensuring survival of a free and unrestricted Internet, and restoring an objective, unbiased media. Protecting our civil rights also requires eliminating the influence of special interests over our government and creating more transparency in government and business.
